What is Counseling?

Talking with a counselor is different than talking to a friend, relative, or other person in your everyday life. Counseling is a form of professional help in which people get support to address issues that are interfering with their lives and their sense of fulfillment.

Counselors are trained to be compassionate, nonjudgmental, unbiased listeners. They can help you get to the root of what is bothering you and, in a way, they can help you to help yourself.

Counselors are also trained to deal with a variety of crisis situations (such as suicide, rape, sexual harassment) and have an extensive referral network of mental health professionals to ensure students get the help they need.

Who Can Use the Counseling Center?

The Counseling Center offers counseling services to anyone who is currently enrolled and registered as an undergraduate or graduate student at Baruch College. Consultation sessions are also offered to Baruch faculty and staff in order to assist them with students of concern.

What Does the Counseling Center Offer?

The Counseling Center provides free culturally-responsive and trauma-informed mental health services to students through a social justice lens. Our diverse staff work to facilitate growth, connection, and psychological well-being so students can be successful in college and beyond.
